

## CS350: Data Structures Class Notes

*Week 7, Class 19: Monday, October 13, 2008*

Today we,

- Returned and went over matrix project—great job by everyone
- Talked briefly about MTA project
- Recapped stacks and queues with arrays
- Finished up search—best, average, & worst case, pay attention to indices on recursive, binary search
- Started talking about hash tables

### **Homework for Wednesday:**

Fix Listing 7.7 to check if item is on the list before attempting to remove.

Problem 2, P181
