

Introduction to Course Studio: Lesson 2

The Course Homepage

Click on the **Click here to:** link in the My Courses channel under the **Faculty Sample** tab.

In the **My Courses** screen, click on the link to one of the courses you are teaching this semester.

This will bring you to the **Course Homepage** for this course.

Students automatically are given access to the course Homepage when they enroll in the course.

When you begin, the Homepage will have very little content – just some information about the course and instructor in the upper section of the right column. The next few lessons will show you how to add content to the Homepage.
